Subject Index

Acid sites
Catalytic alkylation of phenol with methanol: factors influencing activities and selectivities. I. Effect of different acid sites evaluated by studying the behaviour of the catalysts: γ-alumina, Nafion-H, silica–alumina and phosphoric acid 83

Acidity
Mordenite with long life and selectivity for methanol conversion to gasoline: Mordenite modified by barium ion exchange, dealumination and chemical vapor deposition of silicon methoxide 297

Acidity
Activity and selectivity of 1-hexene conversion on SAPO-11 and Pd/SAPO-11 173

Adsorption
Fourier transform-infrared study of the adsorption and coadsorption of nitric oxide, nitrogen dioxide and ammonia on TiO_2 anatase 243

Adsorption
Fourier transform-infrared study of the adsorption and coadsorption of nitric oxide, nitrogen dioxide and ammonia on vanadia–titania and mechanism of selective catalytic reduction 259

Adsorption
Kinetic study of the carbonyl sulphide synthesis from carbon dioxide and carbon disulphide on alumina catalysts 143

Adsorption
Chemical interaction of palladium particles with iron cations in NaY 225

Ageing
Kinetic study of the carbonyl sulphide synthesis from carbon dioxide and carbon disulphide on alumina catalysts 143

Ageing
Catalytic properties and surface states of cobalt-containing oxidation catalysts 209

Alkylamines
Characteristic action of zirconium dioxide in the decomposition of alkylamines 41

Alloy formation
XPS studies of Pt–Sn naphtha reforming catalysts 71

Alloying
The effect of platinum modification by alloying and sulfur on the hydrogenolysis and aromatization of methylcyclopentane 279

Alumina
Kinetic study of the carbonyl sulphide synthesis from carbon dioxide and carbon disulphide on alumina catalysts 143

Alumina (γ-)
Catalytic alkylation of phenol with methanol: factors influencing activities and selectivities. I. Effect of different acid sites evaluated by studying the behaviour of the catalysts: γ-alumina, Nafion-H, silica–alumina and phosphoric acid 83

Ammonia
Fourier transform-infrared study of the adsorption and coadsorption of nitric oxide, nitrogen dioxide and ammonia on TiO_2 anatase 243

Ammonia
Fourier transform-infrared study of the adsorption and coadsorption of nitric oxide, nitrogen dioxide and ammonia on vanadia–titania and mechanism of selective catalytic reduction 259

Barium
Mordenite with long life and selectivity for methanol conversion to gasoline: Mordenite modified by barium ion exchange, dealumination and chemical vapor deposition of silicon methoxide 297

Calcination
Preparation of vanadium phosphorus oxide catalysts: Influence of macroscopic P:V ratio in determining phase composition after calcination 161

Carbon monoxide methanation
Catalysis of carbon monoxide methanation by deep sea manganate minerals 309

Carbonyl sulphide
Kinetic study of the carbonyl sulphide synthesis from carbon dioxide and carbon disulphide on alumina catalysts 143

Catalyst characterization (BET, XRD)

Selective steam reforming of alkylated hydrocarbons and coal liquids over NiO–Fe_2O_3 catalysts 55

Catalyst characterization (EXAFS, IR, NMR, XPS)
Recent progress in catalytic technology in Japan – a Review 1

Catalyst characterization (EXAFS, Mössbauer, TPR, TPD, FT-IR)
Chemical interaction of palladium particles with iron cations in NaY 225

Catalyst characterization (FT-IR)
Fourier transform-infrared study of the adsorption and coadsorption of nitric oxide, nitrogen dioxide and ammonia on TiO_2 anatase 243

Catalyst characterization (IR, TG, TPD, XRD)
Characteristics and performance of SAPO-34 catalyst for methanol-to-olefin conversion 31

Catalyst characterization (IR)
Fourier transform-infrared study of the adsorption and coadsorption of nitric oxide, nitrogen dioxide and ammonia on vanadia–titania and mechanism of selective catalytic reduction 259

Catalyst characterization (TPD)
Characteristic action of zirconium dioxide in the decomposition of alkylamines 41

Catalyst characterization (XPS)
XPS studies of Pt–Sn naphtha reforming catalysts 71

Catalyst characterization (XRD)
Reactivity and stability of sulphided thin films of molybdenum to dry air 191

Catalyst characterization (XRD)
The effect of platinum modification by alloying and sulfur on the hydrogenolysis and aromatization of methylcyclopentane 279

Catalyst preparation (acetone solution)
XPS studies of Pt–Sn naphtha reforming catalysts 71

Catalyst preparation (alcohol refluxing)
Preparation of vanadium phosphorus oxide catalysts: Influence of macroscopic P:V ratio in determining phase composition after calcination 161

Catalyst preparation (coprecipitation, impregnation)
Selective steam reforming of alkylated hydrocarbons and coal liquids over NiO–Fe_2O_3 catalysts 55

Catalyst preparation (crystallization)
Characteristics and performance of SAPO-34 catalyst for methanol-to-olefin conversion 31

Catalyst preparation (impregnation)
Recent progress in catalytic technology in Japan – a Review 1

Catalyst preparation (impregnation)
Fourier transform-infrared study of the adsorption and coadsorption of nitric oxide, nitrogen dioxide and ammonia on vanadia–titania and mechanism of selective catalytic reduction 259

Catalyst preparation (ion exchange)
Mordenite with long life and selectivity for methanol conversion to gasoline: Mordenite modified by barium ion exchange, dealumination and chemical vapor deposition of silicon methoxide 297

Catalyst preparation (ion exchange)
Highly selective reduction of nitrogen oxides with hydrocarbons over H-form zeolite catalysts in oxygen-rich atmospheres L1

Catalyst preparation (wet impregnation, solid/solid wetting)
Comparative activity study in thiophene hydrosulfurization of molybdena/alumina catalysts prepared by impregnation and solid/solid wetting L5

Catalyst preparation (wet impregnation)
The effect of platinum modification by alloying and sulfur on the hydrogenolysis and aromatization of methylcyclopentane 279

Coadsorption
Fourier transform-infrared study of the adsorption and coadsorption of nitric oxide, nitrogen dioxide and ammonia on TiO_2 anatase 243

Coadsorption
Fourier transform-infrared study of the adsorption and coadsorption of nitric oxide, nitrogen dioxide and ammonia on vanadia–titania and mechanism of selective catalytic reduction 259

Coal liquids

Selective steam reforming of alkylated hydrocarbons and coal liquids over NiO–Fe_2O_3 catalysts 55
Cobalt/alumina
Catalytic properties and surface states of cobalt-containing oxidation catalysts 209
Coke formation
Catalytic alkylation of phenol with methanol: factors influencing activities and selectivities. I. Effect of different acid sites evaluated by studying the behaviour of the catalysts: γ-alumina, Nafion-H, silica–alumina and phosphoric acid 83

Deactivation
Catalytic properties and surface states of cobalt-containing oxidation catalysts 209
Deamination/dealkylation
Characteristic action of zirconium dioxide in the decomposition of alkylamines 41
Decalin cracking
Use of principal component analysis in catalyst characterization: Catalytic cracking of decalin over Y-zeolites 119
Dehydrogenation
Characteristic action of zirconium dioxide in the decomposition of alkylamines 41

Enzymatic (chemo-enzymatic) processes
Recent progress in catalytic technology in Japan – a Review 1

Heteropoly acids
Recent progress in catalytic technology in Japan – a Review 1
Hexene cracking
Activity and selectivity of 1-hexene conversion on SAPO-11 and Pd/SAPO-11 173
Hydrogen desorption
Catalysis of carbon monoxide methanation by deep sea manganate minerals 309
Hydrogen transfer
Use of principal component analysis in catalyst characterization: Catalytic cracking of decalin over Y-zeolites 119

Intracrystalline diffusion
Catalytic alkylation of phenol with methanol: factors influencing activities and selectivities. II. Effect of intracrystalline diffusion and shape selectivity on H-ZSM5 zeolite 101
Iridium
The effect of platinum modification by alloying and sulfur on the hydrogenolysis and aromatization of methylcyclopentane 279
Iridium–cobalt
The effect of platinum modification by alloying and sulfur on the hydrogenolysis and aromatization of methylcyclopentane 279
Isomerization
Use of principal component analysis in catalyst characterization: Catalytic cracking of decalin over Y-zeolites 119

Kinetics
Kinetic study of the carbonyl sulphide synthesis from carbon dioxide and carbon disulphide on alumina catalysts 143

Lewis acid sites
Fourier transform-infrared study of the adsorption and coadsorption of nitric oxide, nitrogen dioxide and ammonia on vanadia–titania and mechanism of selective catalytic reduction 259
Lewis acid sites
Fourier transform-infrared study of the adsorption and coadsorption of nitric oxide, nitrogen dioxide and ammonia on TiO_2 anatase 243

Magnesium oxide
Characteristic action of zirconium dioxide in the decomposition of alkylamines 41
Manganese nodules
Catalysis of carbon monoxide methanation by deep sea manganate minerals 309
Methane oxidation
Catalytic properties and surface states of cobalt-containing oxidation catalysts 209
Methanol
Catalytic alkylation of phenol with methanol: factors influencing activities and selectivities. I. Effect of different acid sites evaluated by studying the behaviour of the catalysts: γ-alumina, Nafion-H, silica–alumina and phosphoric acid 83
Methanol

Catalytic alkylation of phenol with methanol: factors influencing activities and selectivities. II. Effect of intracrystalline diffusion and shape selectivity on H-ZSM5 zeolite 101

Methanol conversion
Characteristics and performance of SAPO-34 catalyst for methanol-to-olefin conversion 31

Methanol conversion
Mordenite with long life and selectivity for methanol conversion to gasoline: Mordenite modified by barium ion exchange, dealumination and chemical vapor deposition of silicon methoxide 297

Methylcyclopentane hydrogenolysis
The effect of platinum modification by alloying and sulfur on the hydrogenolysis and aromatization of methylcyclopentane 279

Molybdena/alumina
Comparative activity study in thiophene hydrosulfurization of molybdena/alumina catalysts prepared by impregnation and solid/solid wetting L5

Molybdenum/alumina
Reactivity and stability of sulphided thin films of molybdenum to dry air 191

Molybdenum films
Reactivity and stability of sulphided thin films of molybdenum to dry air 191

Mordenite
Mordenite with long life and selectivity for methanol conversion to gasoline: Mordenite modified by barium ion exchange, dealumination and chemical vapor deposition of silicon methoxide 297

Nafion-H
Catalytic alkylation of phenol with methanol: factors influencing activities and selectivities. I. Effect of different acid sites evaluated by studying the behaviour of the catalysts: γ-alumina, Nafion-H, silica–alumina and phosphoric acid 83

Nickel oxide–iron(III) oxide
Selective steam reforming of alkylated hydrocarbons and coal liquids over NiO–Fe_2O_3 catalysts 55

Nitric oxide
Fourier transform-infrared study of the adsorption and coadsorption of nitric oxide, nitrogen dioxide and ammonia on TiO_2 anatase 243

Nitrogen dioxide
Fourier transform-infrared study of the adsorption and coadsorption of nitric oxide, nitrogen dioxide and ammonia on TiO_2 anatase 243

Nitrogen dioxide
Fourier transform-infrared study of the adsorption and coadsorption of nitric oxide, nitrogen dioxide and ammonia on vanadia–titania and mechanism of selective catalytic reduction 259

Nitrogen oxide
Fourier transform-infrared study of the adsorption and coadsorption of nitric oxide, nitrogen dioxide and ammonia on vanadia–titania and mechanism of selective catalytic reduction 259

Nitrogen oxides reduction
Highly selective reduction of nitrogen oxides with hydrocarbons over H-form zeolite catalysts in oxygen-rich atmospheres L1

Oxidation
Preparation of vanadium phosphorus oxide catalysts: Influence of macroscopic P:V ratio in determining phase composition after calcination 161

Oxidation
Reactivity and stability of sulphided thin films of molybdenum to dry air 191

Oxidation catalysts
Catalytic properties and surface states of cobalt-containing oxidation catalysts 209

Palladium ion
Chemical interaction of palladium particles with iron cations in NaY 225

Palladium/zeolite
Activity and selectivity of 1-hexene conversion on SAPO-11 and Pd/SAPO-11 173

Palladium–tellurium
Recent progress in catalytic technology in Japan – a Review 1

Phenol alkylation
Catalytic alkylation of phenol with methanol: factors influencing activities and selectivities.

II. Effect of intracrystalline diffusion and shape selectivity on H-ZSM5 zeolite 101
Phenol alkylation
Catalytic alkylation of phenol with methanol: factors influencing activities and selectivities. I. Effect of different acid sites evaluated by studying the behaviour of the catalysts: γ-alumina, Nafion-H, silica–alumina and phosphoric acid 83
Phosphoric acid
Catalytic alkylation of phenol with methanol: factors influencing activities and selectivities. I. Effect of different acid sites evaluated by studying the behaviour of the catalysts: γ-alumina, Nafion-H, silica–alumina and phosphoric acid 83
Physical treatment
Preparation of vanadium phosphorus oxide catalysts: Influence of macroscopic P:V ratio in determining phase composition after calcination 161
Platinum
The effect of platinum modification by alloying and sulfur on the hydrogenolysis and aromatization of methylcyclopentane 279
Platinum/alumina
The effect of platinum modification by alloying and sulfur on the hydrogenolysis and aromatization of methylcyclopentane 279
Platinum/silica
The effect of platinum modification by alloying and sulfur on the hydrogenolysis and aromatization of methylcyclopentane 279
Platinum–cobalt
The effect of platinum modification by alloying and sulfur on the hydrogenolysis and aromatization of methylcyclopentane 279
Platinum–copper
The effect of platinum modification by alloying and sulfur on the hydrogenolysis and aromatization of methylcyclopentane 279
Platinum–iridium
The effect of platinum modification by alloying and sulfur on the hydrogenolysis and aromatization of methylcyclopentane 279
Platinum–rhenium
The effect of platinum modification by alloying and sulfur on the hydrogenolysis and aromatization of methylcyclopentane 279
Platinum–tin/alumina
XPS studies of Pt–Sn naphtha reforming catalysts 71

Rhodium
Recent progress in catalytic technology in Japan – a Review 1

Sea minerals
Catalysis of carbon monoxide methanation by deep sea manganate minerals 309
Selective catalytic reduction
Fourier transform-infrared study of the adsorption and coadsorption of nitric oxide, nitrogen dioxide and ammonia on vanadia–titania and mechanism of selective catalytic reduction 259
Selectivity (anisole, o-cresol, p-cresol, 2,6-xylenol, methylanisole)
Catalytic alkylation of phenol with methanol: factors influencing activities and selectivities. I. Effect of different acid sites evaluated by studying the behaviour of the catalysts: γ-alumina, Nafion-H, silica–alumina and phosphoric acid 83
Selectivity (benzene, cyclohexane)
The effect of platinum modification by alloying and sulfur on the hydrogenolysis and aromatization of methylcyclopentane 279
Selectivity (double bond shift, cracking products)
Activity and selectivity of 1-hexene conversion on SAPO-11 and Pd/SAPO-11 173
Selectivity (ethene, C_2–C_4 alkenes)
Characteristics and performance of SAPO-34 catalyst for methanol-to-olefin conversion 31
Selectivity (gasoline)
Mordenite with long life and selectivity for methanol conversion to gasoline: Mordenite modified by barium ion exchange, dealumination and chemical vapor deposition of silicon methoxide 297
Selectivity (nitriles)
Characteristic action of zirconium dioxide in the decomposition of alkylamines 41
Selectivity (shape-)
Catalytic alkylation of phenol with methanol: factors influencing activities and selectivities. II. Effect of intracrystalline diffusion and shape selectivity on H-ZSM5 zeolite 101
Silica–alumina

Characteristic action of zirconium dioxide in the decomposition of alkylamines 41

Silica–alumina
Catalytic alkylation of phenol with methanol: factors influencing activities and selectivities. I. Effect of different acid sites evaluated by studying the behaviour of the catalysts: γ-alumina, Nafion-H, silica–alumina and phosphoric acid 83

Silica–alumina
Use of principal component analysis in catalyst characterization: Catalytic cracking of decalin over Y-zeolites 119

Stability
Characteristics and performance of SAPO-34 catalyst for methanol-to-olefin conversion 31

Steam reforming
Selective steam reforming of alkylated hydrocarbons and coal liquids over NiO–Fe_2O_3 catalysts 55

Sulphidation
Reactivity and stability of sulphided thin films of molybdenum to dry air 191

Sulphur
The effect of platinum modification by alloying and sulfur on the hydrogenolysis and aromatization of methylcyclopentane 279

Surface area
Catalysis of carbon monoxide methanation by deep sea manganate minerals 309

Syngas conversion
Catalysis of carbon monoxide methanation by deep sea manganate minerals 309

Thiophene hydrodesulfurization
Comparative activity study in thiophene hydrosulfurization of molybdena/alumina catalysts prepared by impregnation and solid/solid wetting L5

Titania
Fourier transform-infrared study of the adsorption and coadsorption of nitric oxide, nitrogen dioxide and ammonia on TiO_2 anatase 243

Toluene
Selective steam reforming of alkylated hydrocarbons and coal liquids over NiO–Fe_2O_3 catalysts 55

Vanadia–titania
Fourier transform-infrared study of the adsorption and coadsorption of nitric oxide, nitrogen dioxide and ammonia on vanadia–titania and mechanism of selective catalytic reduction 259

Vanadium phosphorus oxide
Preparation of vanadium phosphorus oxide catalysts: Influence of macroscopic P:V ratio in determining phase composition after calcination 161

Zeolites
Highly selective reduction of nitrogen oxides with hydrocarbons over H-form zeolite catalysts in oxygen-rich atmospheres L1

Zeolites
Use of principal component analysis in catalyst characterization: Catalytic cracking of decalin over Y-zeolites 119

Zeolites
Catalytic alkylation of phenol with methanol: factors influencing activities and selectivities. II. Effect of intracrystalline diffusion and shape selectivity on H-ZSM5 zeolite 101

Zeolites
Mordenite with long life and selectivity for methanol conversion to gasoline: Mordenite modified by barium ion exchange, dealumination and chemical vapor deposition of silicon methoxide 297

Zeolites
Characteristics and performance of SAPO-34 catalyst for methanol-to-olefin conversion 31

Zeolites
Activity and selectivity of 1-hexene conversion on SAPO-11 and Pd/SAPO-11 173

Zeolites
Chemical interaction of palladium particles with iron cations in NaY 225

Zeolites
Recent progress in catalytic technology in Japan – a Review 1

Zirconium dioxide
Characteristic action of zirconium dioxide in the decomposition of alkylamines 41
